LinkedIn: faheemabbas766 | GitHub: faheemabbas766 | faheemabbas766.github.io

PROFESSIONAL SUMMARY

Flutter contributor with nine merged PRs across official Flutter repositories, including Android tooling fixes and regression tests. Mobile Software Engineer with 3+ years of professional Flutter experience building Android and iOS apps, plus earlier internship experience. Deliver billing, payments, streaming and AI features; handle iOS releases using Xcode and App Store Connect. Built a Flutter/Firebase hostel operations app with transactional billing, occupancy workflows and 81 passing automated tests. Optimized mobile app delivery size for Google Play distribution.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android TV: Kotlin, Jetpack Compose, responsive UI, Flutter-based Android and iOS apps, Xcode, App Store Connect

Architecture: Clean Architecture, MVVM/MVC, SOLID, Provider, GetX, BLoC/Cubit, repository injection

Integrations: REST APIs, Dio, Firebase Auth/Firestore/FCM/Crashlytics, secure authentication and storage, Stripe, Google Maps, OpenAI APIs

Delivery: Git, GitHub Actions CI/CD, code review, regression testing, production debugging, performance optimization, Play Store/App Store releases

PROFESSIONAL EXPERIENCE

Software Engineer | Invotyx

Islamabad, Pakistan | Jun 2024 - Present

- Delivered billing and content features across Invoice Maker, NewsHub and Android AI products: invoice validation, local persistence, Firebase notifications and REST integrations; supported Android and iOS releases.
- Structure features with Clean Architecture and MVVM/MVC, separating UI, business logic and data access to support maintainable feature development.
- Delivered SmartIPTV Android TV workflows with Kotlin and Jetpack Compose: D-pad navigation, playback, session handling and subscriptions for a product with 100K+ Google Play downloads.
- Implemented tag-triggered GitHub Actions for versioned mobile builds; support release validation, regression checks and production fixes across multiple apps.
- Investigated production crashes using Firebase Crashlytics; a previously recorded 7-day monitoring window showed 99.92% crash-free users and 99.94% crash-free sessions.
- Handle Flutter iOS builds and App Store submissions using Xcode; coordinate backend integrations, QA checks and Android/iOS release preparation.

Independent Mobile App Developer | Freelance (Part-time / Contract)

Remote, Pakistan | Jul 2023 - Nov 2024

- Delivered scoped Flutter work for local and referral clients alongside employed roles: requirements, UI, REST/Firebase integrations, debugging, release support and handover.

Flutter Developer | Final Solutions

Rawalpindi, Pakistan | Nov 2022 - Oct 2023

- Developed IC App member services, profiles, online bill payments, food delivery, cinema bookings and facility reservations; integrated REST APIs, notifications and state management.
- Resolved UI and integration defects and supported release preparation for the member-services application.

Flutter Intern | Creative IT Park

Jan 2021 - Jun 2021

- Built responsive Flutter screens and basic API integrations; used Git for feature updates and resolved UI defects from QA feedback.

SELECTED ENGINEERING PROJECTS

Invoice Maker: Easy Bill

Stack: Flutter / Dart / Firebase / Local storage / PDF

App Store | Google Play

- Implemented invoice, estimate and receipt workflows covering discounts, taxes, payment status, validation and reusable templates.
- Built PDF business-record flows and supported release quality through debugging, UI polish and regression fixes.

Adara App Hub

Stack: Flutter / GetX / Dio / Stripe / REST APIs

- Implemented marketplace browsing, OTP authentication, subscriptions and Stripe-backed payment methods.
- Connected deep links, APK installation and child-app launch workflows with API-backed reviews and marketplace screens.

SmartIPTV | Android TV

Stack: Kotlin / Jetpack Compose / Hilt / Media3 / HLS

- Built TV-specific navigation and playback flows, including D-pad focus, session handling and subscriptions.
- Resolved playback, session and release issues for a product with 100K+ Google Play downloads.

Hostel Manager | Independent Product

Stack: Flutter / Provider / Firebase / Firestore / PDF

- Built room allocation, resident onboarding, monthly fee ledgers, partial payments, checkout settlement and PDF document workflows.
- Implemented transactional occupancy/finance updates, staff access controls and activity records; 81 automated tests cover business rules, repositories and widgets (private source; local test run).

OPEN SOURCE | 9 MERGED PRs IN OFFICIAL FLUTTER REPOSITORIES

3 in flutter/flutter, 4 in flutter/packages and 2 in flutter/core-packages.

- **flutter/flutter #189488** - Fixed app-link settings to use the resolved Android application ID; added an integration test for an environment-backed applicationId.
- **flutter/flutter #188372** - Corrected AndroidX Gradle-property parsing for comments and whitespace; added regression tests.
- **flutter/packages #12316** - Added README package-order validation with an actionable error and regression coverage.
- **flutter/flutter #186184** - Fixed multi-digit device selection in flutter run.

Other merged PRs: google_maps_flutter #12315; video_player_web #11820; cross_file #11662; flutter/core-packages #12 (vector_math Plane docs) and #22 (geometry filter docs).

Public Cubit example: github.com/faheemabbas766/faheemabbas766.github.io/tree/main/examples/fee_ledger
10 tests; new standalone AI-assisted sample. Hostel Manager case study:
